

March 31st – April 1st 2016

Berlin Symposium on Species Barriers in Emerging Viral Diseases

The emergence of epidemic viruses is among the most fascinating fields of research in virology. The existence of species barriers is widely accepted in the field, yet we lack a consensual idea of the cellular and molecular components that constitute species barriers.

During this compact meeting, experts looking at species barrier functions from different angles will provide their insights and perspectives.
Let yourself be inspired.

Be the first...

... apply for a 100 € travel scholarship.
Please send a short letter of motivation (max. 200 words).

Registration:

office@virology-bonn.de

Registration is required, no fee.
Please mention the participant's name and affiliation. Registration will be open until meeting is fully booked, ca. 220 participants.

Venue:

Kaiserin-Friedrich-Stiftung
Robert-Koch-Platz 7,
10115 Berlin, Germany

Confirmed Speakers:

Paul Duprex (Boston, US)
Ron Fouchier (Rotterdam, NL)
Dieter Glebe (Gießen, DE)
Andreas Hocke (Berlin, DE)
Frank Kirchhoff (Ulm, DE)
Renate König (Langen, DE)
Thijs Kuiken (Rotterdam, NL)
Marc Lecuit (Paris, FR)
Jason Mercer (London, GB)
Vincent Munster (Hamilton, US)
Olivier Pernet (Los Angeles, US)
Martin Schwemmle (Freiburg, DE)
Volker Thiel (Bern, CH)
Noël Tordo (Paris, FR)
Aaron Trent Irving (Singapore)
Ronald van Rij (Nijmegen, NL)
Victor Volchkov (Lyon, FR)
